

# ARCH COAL - VIPER MINE

## ENVIRONMENTAL ENGINEER

• **Responsibilities include, but are not limited to:**

- Development, implementation, and monitoring of the effectiveness of environmental procedures and controls for mine operations.
- Collaboration with corporate consultants, state, and federal agencies regarding mining operations and permitting.
- Supervision of engineering consultants in the preparation of permits, amendments, and other documents.
- Preparation for, and coordination of environmental audits.
- Accompany state and federal environmental inspectors during site visits.
- Provide guidance and assistance to mine operations to insure compliance with regulatory requirements.

• **Preferred Education and Experience:**

- Bachelor of Science degree in engineering, geology, biology, environment science, or equivalent field.
- Master's degree desirable, but not required. Equivalent experience may be substituted for educational background.
- 3 years minimum experience in relevant field.
- Experience in mine permitting and working knowledge of environmental regulations.
- Working knowledge of EPA, IDNR, and MSHA rules pertaining to underground coal mining.
